leaders in solar power

Department of Conservation

○ Little Barrier Island

February 2012

In early 2012, we extended the power System on Little Barrier Island for the Department of Conservation.

This extension added an extra 3.5kWp to the solar array that we originally installed in 2007 (see page 32).

The system components that we added are as follows:

- 16 x Sharp 220W Solar Modules
- 4 x Pole Top Frames
- 1 x Sunny Boy 4000TL-20
