Auckland International Airport Arrivals Pier B

○ Auckland International Airport

August 2008

This is the second project we have completed for Auckland International Airport. It is located on Pier B, which is the new pier designed to accommodate the new Airbus 380 aeroplanes. The project was completed on time in August 2008.

The system is 21 kilowatts peak (kWp). The total solar installed by us at Auckland International Airport is in excess of 50kWp.

The system is made up of:

- 21 Kilowatt Solar Array made up of 120 x Sharp Solar 175W panels
- 3 x Sunny Mini Central 6000 grid connect inverters
- Conergy SunTop III array frames
- Sunny Web Box monitoring system connected to a Sharp LCD display screen.
