

### Lockwood Homes Eco-Home

○ Rotorua

December 2007

Lockwood officially opened their new display home – the Gullwing Eco Home – in March 2008. John Key, who was leader of the opposition at the time, officiated. We worked closely with Lockwood throughout the project as they developed their Eco-Smart range of houses and were very pleased to be chosen as the solar power and solar hot water supplier.

The system is made up of:

- 1336 Wp Solar Array made up of 8 x Conergy 167W panels
- 1 x Sunny Boy 1100 inverter
- Conergy Sun Top III Array Frame
- 1 x Sunny Beam wireless display
- Beasley Prestige 330 litre Solar Hot Water System using SP200 Frost Tolerant Collectors
