

Trojan Maroon. Because half the day is night

Count on Trojan Battery Company for the power you need to get you through the night. You'll enjoy life more and accomplish more when your renewable energy system includes the best deep cycle batteries going. Like our breakthrough L16H with its light but strong Polyon™ case. Or the T-105, a long time favorite in PV circles. Both feature maroon cases and easy lift handles. And both benefit from Trojan's performance engineering.

The great ideas we've hatched include our exclusive Alpha Plus™ high density paste formulation,

which delivers the industry's highest concentration of active material. And our proprietary Maxguard™ Advanced Design Separator for increased battery life and run time. Its special design cuts water consumption and maintenance needs.

Not enough hours in the day? Then ask for us by name. Or by color. For the full story on Trojan deep cycle batteries, give us a call us at 800-423-6569 or 562-946-8381. Fax to 562-906-4033, or visit www.trojanbattery.com. (Trojan's business hours are 7:30 a.m. to 4:00 p.m. Pacific time.)

TROJAN
DEEP CYCLE

Look for LEUs to make deep cycle battery comparison simple.

Pioneered by Trojan, Lifetime Energy Units™ are an accurate, convenient way to compare the relative value of one deep cycle battery to another. Simply stated, Lifetime Energy Units (LEUs) signify the number of kilowatt-hours of energy a battery delivers over its useful life. The bigger the number, the more work the battery can perform. Yes, it's that simple!
